Argonne National Laboratory

Institutional Plan

FY 2003 – FY 2007

ANL/IP-2002

Pioneering Science and Technology

October 2002

Operated by The University of Chicago for the U.S. Department of Energy

Argonne National Laboratory

INSTITUTIONAL PLAN

FY 2003 – FY 2007

ANL/IP-2002

Operated by The University of Chicago for the
U.S. Department of Energy under Contract W-31-109-Eng-38

October 2002

This October 2002 *Institutional Plan* was originally prepared in the early spring of 2002. It generally describes the activities and plans of Argonne National Laboratory as of that time. Thus, for example, financial data for FY 2002 are mid-year projections. In addition, a few selected revisions to the *Draft Institutional Plan* of May 2002 are included to reflect comments received and major shifts in plans.

DISCLAIMER

This report was prepared as an account of work sponsored by an agency of the United States Government. Neither the United States Government nor any agency thereof, nor The University of Chicago, nor any of their employees or officers, makes any warranty, express or implied, or assumes any legal liability or responsibility for the accuracy, completeness, or usefulness of any information, apparatus, product, or process disclosed, or represents that its use would not infringe privately owned rights. Reference herein to any specific commercial product, process, or service by trade name, trademark, manufacturer, or otherwise does not necessarily constitute or imply its endorsement, recommendation, or favoring by the United States Government or any agency thereof. The views and opinions of document authors expressed herein do not necessarily state or reflect those of the United States Government or any agency thereof, Argonne National Laboratory, or The University of Chicago.

Argonne National Laboratory, with facilities in the states of Illinois and Idaho, is owned by the United States Government and operated by The University of Chicago under the provisions of a contract with the Department of Energy.

Contents

I. Laboratory Director's Statement I-1

II. Mission, Roles, and Strategic Objectives II-1

A. Vision and Mission II-1

B. Scientific and Technical Core Competencies II-1

C. Roles in Accomplishment of DOE Missions II-2

D. Strategic Context and Planning Assumptions II-4

E. Strategic Objectives II-5

III. Major Laboratory Initiatives III-1

A. Science III-1

1. Nanosciences and Nanotechnology — Center for Nanoscale Materials III-1
2. Rare Isotope Accelerator III-3
3. Functional Genomics III-4
4. Petaflops Computing and Computational Science III-6

B. Energy III-8

1. Advanced Nuclear Fuel Cycle III-8

IV. Science and Technology Strategic Plan IV-1

A. R&D Area Strategic Plans IV-1

1. Fundamental Science and National Research Facilities IV-1
   a. Advanced Photon Source IV-1
   b. Materials Science IV-6
   c. Chemical Sciences IV-9
   d. Nuclear Physics and the Argonne Tandem-Linac Accelerator System IV-12
   e. High Energy Physics IV-13
   f. Mathematics, Computing, and Information Sciences IV-16
   g. Intense Pulsed Neutron Source IV-17
   h. Biosciences IV-20
   i. Environmental Research IV-22
   j. Science and Engineering Education and University Programs IV-26
2. Energy and Environmental Technologies IV-27
   a. Advanced Nuclear Technology IV-27
   b. Energy and Industrial Technologies IV-30
   c. Transportation Technologies IV-33
   d. Environmental Treatment Technologies IV-35
   e. Energy and Environmental Systems IV-39
   f. Biotechnology IV-42

3. National Security IV-43
a. Nuclear Nonproliferation and Arms Control IV-43
b. Infrastructure Assurance and Counterterrorism IV-48

4. Collaborative R&D Partnerships IV-51

B. Laboratory Directed R&D Program IV-52

V. Operations and Infrastructure Strategic Plan V-1

A. Human Capital V-2

B. Environment, Safety, and Health V-4

C. Site and Facilities V-6

D. Integrated Safeguards and Security Management V-9

E. Information Management V-11

F. Communications, Outreach, and Community Relations V-15

G. Performance Management V-16

H. Cost-Effectiveness of Support Functions V-18

VI. Resource Projections VI-1

Appendix: Argonne in an Integrated DOE Laboratory System A-1

Supplement 1: Work for Sponsors other than DOE S1-1

A. Nuclear Regulatory Commission S1-1

B. Department of Defense S1-3

C. Department of Health and Human Services S1-8

D. Other Federal Agencies S1-9

E. Nonfederal Organizations S1-12

Supplement 2: Technology Transfer S2-1

A. R&D Agreements S2-1

B. Licensing S2-1

C. Non-WFO Funding from the State of Illinois S2-3

Supplement 3: Site and Facilities S3-1

A. Description of Site and Facilities S3-1

B. Site and Facilities Trends S3-6

C. Facility Management Operating Strategies S3-8

D. Planning Approach for General Purpose Infrastructure S3-10

E. Facilities Resource Requirements S3-12

F. Assets Management, Space Management, and Inactive Surplus Facilities S3-16

G. Energy Management and Sustainable Design S3-19

H. Third-Party Financing S3-19

Supplement 4: Other Charts and Tables S4-1

A. Science and Math Education S4-1

B. User Facilities S4-1

C. Subcontracting and Procurement S4-1
